

Ram Prasath

Software Engineer | Full-Stack Web Developer

Bengaluru, Karnataka 560016 | +91 7395884405 | ramprasathdevelop@gmail.com | LINKEDIN | GITHUB

Professional Summary

Front-End / Full-Stack Web Developer with hands-on experience building responsive, high-performance web applications using React.js, Next.js, Node.js, and modern JavaScript/TypeScript. Track record of improving page load speed by up to 35%, boosting organic search rankings by 25%, and increasing user engagement through accessible (WCAG), SEO-optimized, data-driven interfaces. Seeking to apply strong front-end engineering, web performance optimization, and cross-functional collaboration skills to a Software Engineer / Full-Stack Developer role.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS/SASS
- **Frameworks & Libraries:** React.js, Next.js, Angular.js, Vue.js, Bootstrap
- **Web Technologies & Tools:** Node.js, WordPress, RESTful APIs, Headless CMS (Ghost), Progressive Web Apps (PWA), Web Accessibility (WCAG)
- **Performance Engineering:** Core Web Vitals (LCP, FID, CLS), Lazy Loading, Code Splitting, Image Optimization, Cross-Browser Compatibility, Responsive Design
- **Tools & DevOps:** Git, GitHub, GitLab, CI/CD
- **SEO & Analytics:** On-Page SEO, Schema Markup, Meta Tag Optimization, Google Search Console, Google Analytics, Google Tag Manager, Web Analytics

Work Experience

Software Engineer

January 2026 – Present

Athena Technology Solutions (Athenatec)

Bengaluru, India

- Migrated and modernized the existing WordPress website to Next.js, building a responsive, scalable, and SEO-friendly web application.
- Improved website performance and optimized page loading, resulting in approximately 35% faster page load times.
- Developed responsive and interactive UI components using Next.js, React, TypeScript, HTML5, CSS3, and JavaScript, ensuring a consistent experience across desktop and mobile devices.
- Designed and implemented animated and interactive website sections to improve user engagement and overall user experience.
- Developed and integrated backend functionality using Node.js, contributing to end-to-end feature development from front-end implementation to back-end integration.
- Worked on SEO optimization, including technical improvements, Google Search Console, Google Analytics, Google Tag Manager, and website performance monitoring.
- Collaborated with designers and team members to translate requirements and designs into production-ready web interfaces.
- Managed source code using Git/GitHub and handled development, testing, and deployment workflows.

Software Engineer

March 2024 – January 2026

Custom Software Development Company [Zibtek]

Bengaluru, India

- Developed responsive, cross-browser web applications using HTML5, CSS3, and JavaScript (ES6+), reducing page load time by 20% through DOM optimization and modern build practices.
- Engineered mobile- and desktop-compatible features that improved user retention by 15% across platforms.
- Optimized website performance, load times, and WCAG accessibility compliance, enhancing mobile UX and SEO rankings.

- Partnered with UI/UX designers and back-end engineers to design, build, and ship 5+ interactive features, increasing overall site engagement.
- Maintained a shared codebase using Git/GitHub with structured version control, enabling smooth, low-risk deployments.

Relevant Projects

Marketing Website Enhancement – Next.js Platform

March 2024 – January 2025

- Led the redesign and performance optimization of the company marketing website using Next.js, React, and modern web tooling, improving user engagement and conversion rates.
- Implemented SEO best practices, metadata, and Core Web Vitals (LCP, FID, CLS) optimizations, improving site speed by 35% and organic search rankings by 25%.
- Built and integrated responsive, brand-consistent landing pages for marketing campaigns, driving a 30% increase in lead generation.
- Collaborated with marketing stakeholders to analyze user behavior and analytics, translating insights into data-driven content and UX improvements.
- Applied image optimization, lazy loading, and code-splitting strategies to further improve overall site performance.

Automation Script Project – UI & Database Development

- Developed and enhanced the user interface for an automation scripting application using ASP.NET, HTML, CSS, JavaScript, and responsive UI components.
- Implemented interactive application workflows and functionality to improve usability and streamline automation-related operations.
- Worked with SQL Server to design, query, and manage application data supporting backend functionality.
- Integrated frontend UI components with backend functionality and database operations for end-to-end feature development.
- Used Git and GitHub for source control, code management, and collaborative development.

PatchLoader – ASP.NET Application

- Developed and enhanced the user interface for the PatchLoader application using ASP.NET, HTML, CSS, and JavaScript.
- Implemented application functionality and user workflows within the ASP.NET backend.
- Worked on form handling, data processing, validation, and UI interactions to improve application usability.
- Debugged and enhanced existing application functionality while maintaining UI consistency across application screens.

Education

Bachelor of Science – Botany

Periyar University College, Harur

August 2019 – April 2022

Tamil Nadu, India

- Built strong analytical, research, and problem-solving skills through coursework and applied scientific methodology, directly transferable to structured technical and software problem-solving.
